

Magnetic Music Board with a Keyboard

A music aid that naturally develops musical thinking and creativity of children

There is nothing in the way of your little composer...

Writable and dry erasable surface – The Board is suitable for writing with white board markers. You can write on both sides of it.

Playful method of teaching notes – on the magnetic table children have the stave at their fingertips. The possibility to rearrange the notes on the board can also be very engaging.

No limits in the music creations – magnetic notes can be easily attached and moved around the board, it is also very easy to write and erase notes and other symbols.

€ 39,90

Magnetic Music Board includes:
Set of 57 kinds of magnetic notes and symbols in a well arranged folder. The total number of notes and symbols included is 240.

Universal development of children's imagination – the board enables children to express their feelings evoked by musical composition by drawing a picture right below the stave or on the other side of the board.

Even the rhythms practicing can be fun if you create the rhythmical exercise right on The Magnetic Board.

Easy score of fingering and its practicing right on the keyboard of The Magnetic Board.

Easy familiarization with intervals, scales, chords and their turnarounds.

More notes or pictures available for purchase.

A professional's view.

Prof. Alena Vlasáková about the Magnetic Music Board: Magnetic Music Board with a Keyboard is a modern teaching aid that can be used both at schools and during music schools pupils' home revisions. Its playful form enables the students to learn to write and read the notes for their musical - especially piano - lessons. Moreover, its creative usage is facilitated by the added magnetic notes in various rhythmical values, clefs, sequential designations, pauses etc. It is great that this teaching aid is finally on the market.
